

**WHAT IS CLAIMED IS:**

1 1. An original document indication device comprising:  
2 a document creating portion for creating a document on a medium;  
3 a counterfeit countermeasure transferring portion for creating an original  
4 document indication on the medium;  
5 a transporting means for transporting the medium; and  
6 a controlling portion for controlling operation of the document creating  
7 portion, the counterfeit countermeasure transferring portion and the transporting  
8 means based on signals input from an operating portion;  
9 wherein the original document indication is created as the medium is  
10 transported by the transporting means through the document creating portion and the  
11 counterfeit countermeasure transferring portion.

1 2. An original document indication device according to Claim 1, wherein  
2 the counterfeit countermeasure transferring portion comprises a hot stamp unit  
3 comprising a cartridge.

1 3. An original document indication device according to Claim 2, wherein  
2 the hot stamp unit further comprises identification codes.

1 4. An original document indication device according to Claim 1, wherein a first  
2 original document is created and is saved in an electronic file and a second original  
3 document is created from the first original document.

1 5. A hot stamp unit comprising a cartridge having identification codes with  
2 which the authenticity of the cartridge can be verified wherein the hot stamp unit can  
3 be used as a counterfeit countermeasure transferring portion in an original document  
4 indication device.

1 6. An original document with an original document indication produced by using  
2 an original document indication device comprising:  
3 a document creating portion for creating a document on a medium;  
4 a counterfeit countermeasure transferring portion for creating an original  
5 document indication on the medium;  
6 a transporting means for transporting the medium; and  
7 a controlling portion for controlling operation of the document creating  
8 portion, the counterfeit countermeasure transferring portion and the transporting  
9 means based on signals input from an operating portion;  
10 wherein the original document indication is created as the medium is  
11 transported by the transporting means through the document creating portion and the  
12 counterfeit countermeasure transferring portion.

1 7. A method for preparing an original document with an original document  
2 indication comprising using an original document indication device comprising:  
3 a document creating portion for creating a document on a medium;  
4 a counterfeit countermeasure transferring portion for creating an original  
5 document indication on the medium;  
6 a transporting means for transporting the medium; and

7 a controlling portion for controlling operation of the document creating  
8 portion, the counterfeit countermeasure transferring portion and the transporting  
9 means based on signals input from an operating portion;  
10 wherein the original document indication is created as the medium is transported by  
11 the transporting means through the document creating portion and the counterfeit  
12 countermeasure transferring portion.
